PROPOSAL & QUOTE

Prime Residential Movers

Website Design & Development Proposal

PREPARED FOR	CONTACT	PREPARED BY	DATE
Prime Residential Movers	Leonardo Gabriel	Leanne Digital	November 5, 2026

Project Overview

Thank you for taking the time to meet with me, Leo. It was great learning more about Prime Residential Movers and your plans for the website.

During our conversation, you mentioned that you've invested significantly in website development and SEO over the years. While your website has generated organic traffic and leads, you're experiencing challenges with its performance, outdated design, and limitations with Beaver Builder and your current hosting provider.

You're also actively learning more about SEO and AI search visibility, and want the flexibility to implement those strategies yourself without relying on a developer for every update.

> Our recommendation is to **rebuild your existing website in WordPress using Elementor**, retaining the content and SEO work you've already invested in while creating a faster, more modern website that's easier to manage.
>
> **The goal isn't to start over. It's to improve the foundation of what you've already built.**

Our Recommended Approach

After reviewing your existing website, I identified approximately **35 pages across your core website, moving services, and service locations**, in addition to your existing blog posts.

Because of the size of your website and the SEO work already completed, I recommend rebuilding the entire website rather than reducing its content or starting with a smaller site.

To make the process more cost-effective, we'll develop reusable Elementor templates for your service and location pages. These templates will allow us to rebuild your existing pages efficiently while maintaining a consistent design throughout the website.

They will also make it easier for you to create additional pages in the future.

01

Website Design & Development

We'll rebuild Prime Residential Movers in WordPress using Elementor, replacing the existing Beaver Builder setup.

Website Design

- ✓ Updated homepage design with a more modern, professional appearance
- ✓ Improved website navigation and content organization
- ✓ Consistent styling, typography, and page layouts
- ✓ Clear calls to action encouraging visitors to request moving quotes
- ✓ Responsive design for desktop, tablet, and mobile devices

Website Development

- ✓ WordPress and Elementor setup
- ✓ Rebuilding approximately 35 existing website pages
- ✓ Transferring existing text, images, and content
- ✓ Reusable Elementor templates for moving service pages
- ✓ Reusable Elementor templates for location-specific pages
- ✓ Blog post template and migration of existing blog posts
- ✓ New website inquiry form
- ✓ Integration of essential website functionality
- ✓ Cross-browser and mobile testing

All existing pages will be rebuilt using their current content. This proposal does not include rewriting the content or developing new SEO landing pages.

> **Designed for Future Growth**
>
> One of the benefits of Elementor is that you'll be able to manage and expand the website yourself.
>
> For example, if you want to create a new location page targeting an additional Florida community, you can duplicate an existing template, update the content, and publish the page without needing a developer to create a new layout.
>
> This gives you more control over your ongoing SEO efforts while maintaining a consistent website design.

02

SEO Preservation & Technical Setup

You've already invested considerable resources into SEO, and preserving that work is an important part of this rebuild.

We'll take care to retain your existing content and website structure wherever possible.

What's Included

- ✓ Review of existing page URLs and website structure
- ✓ Preservation of existing URLs wherever possible
- ✓ Transfer of existing page titles and meta descriptions where appropriate
- ✓ Migration of existing blog posts
- ✓ Preservation of relevant internal links
- ✓ Redirects where URL changes are necessary
- ✓ XML sitemap setup
- ✓ Search engine indexing configuration
- ✓ Foundational technical SEO optimization
- ✓ Mobile responsiveness and performance-focused development
- ✓ Website testing before launch

A website rebuild can sometimes cause temporary changes in search rankings as search engines recrawl the updated pages. Our approach is designed to minimize unnecessary disruption by retaining the existing content and URLs wherever possible.

Supporting Your SEO & AI Search Goals

During our call, you mentioned that customers have been discovering Prime Residential Movers through ChatGPT, which is an encouraging sign.

We'll structure the rebuilt website to support your continued SEO efforts, including:

- Service-specific content
- Location-specific landing pages
- Internal linking between relevant services and locations
- Clear page headings and content organization
- Search-engine-friendly website architecture

This will provide a foundation for you to continue implementing the SEO strategies you're learning.

Ongoing SEO campaigns, keyword research, new content writing, and AI search optimization services are not included in the initial rebuild, but can be added separately if needed.

03

Website Hosting & Migration

You mentioned that you're currently hosting with GoDaddy and are interested in moving to Hostinger, where you already have another website.

We're happy to work with Hostinger or another hosting provider of your choice.

We also offer hosting through Leanne Digital if you'd prefer us to manage the hosting environment.

OPTION A

Your Preferred Hosting Provider

ONE-TIME WEBSITE MIGRATION

$200 CAD

We'll transfer your rebuilt website to Hostinger or another hosting provider of your choosing.

THIS INCLUDES

- ✓ Website migration and hosting configuration
- ✓ Domain and SSL setup
- ✓ Testing the website in its new hosting environment
- ✓ Confirming the website is functioning correctly after migration

Hosting subscription fees are paid directly to your chosen provider.

OPTION B

Leanne Digital Hosting

ANNUAL HOSTING

$300 CAD/year

If you choose to host your website with Leanne Digital, we'll **waive the $200 website migration fee**.

We'll handle your hosting setup and server configuration, providing a managed hosting environment for your WordPress website.

You will retain full administrative access and ownership of your website regardless of which hosting option you choose.

04

Website Training & Ownership

A priority you mentioned during our call was being able to manage your own website without constantly relying on someone else to make changes.

That's something we strongly support.

Once the rebuild is complete, we'll provide an Elementor training session covering:

- ✓ Editing existing pages
- ✓ Creating new service pages using your templates
- ✓ Creating new location pages
- ✓ Updating images, text, and links
- ✓ Publishing and editing blog posts
- ✓ Managing basic WordPress content

You'll receive full administrator access to your website and be able to continue developing your content independently.

We also include 30 days of post-launch support to address any technical issues related to the website rebuild.

05

Project Investment

As mentioned during our call, **our website packages start at $3,000 CAD** for smaller websites.

After reviewing Prime Residential Movers' current website, I found that the project is considerably larger than a standard website build, with approximately 35 pages plus existing blog content.

Because you've already invested significantly in SEO, I recommend rebuilding all existing pages rather than removing content that may already be contributing to your search visibility.

To keep the project cost-effective, we'll use reusable Elementor templates for your service and location pages. This allows us to rebuild the full website while keeping development costs lower than designing every page individually.

Website Rebuild Investment

$5,000 CAD

This includes the complete rebuild of approximately 35 existing pages, migration of existing blog posts, reusable templates, foundational technical SEO, training, and launch support.

Hosting & Migration Pricing

SERVICE	YOUR HOSTING PROVIDER	LEANNE DIGITAL HOSTING
35-page website rebuild	**$5,000**	**$5,000**
Existing blog post migration	**Included**	**Included**
Website migration	**$200**	**Included**
Annual hosting	**Paid to provider**	**$300**
Initial total (CAD)	**$5,200 + hosting**	**$5,300**

A Note About Canadian & US Pricing

Leanne Digital is a Canadian-based company, and all our pricing is in Canadian dollars.

For clients in the United States, the exchange rate can provide a cost advantage. Using an illustrative exchange rate of $0.72 USD per Canadian dollar:

- **$5,200 CAD is approximately $3,744 USD** with your preferred hosting provider, excluding hosting fees.
- **$5,300 CAD is approximately $3,816 USD** with Leanne Digital hosting included for the first year.

The final US dollar amount will depend on the exchange rate and any currency conversion fees at the time of payment.

Payment Terms

- 50% deposit required to begin the project
- Remaining 50% due upon project completion
- Two rounds of design revisions included
- 30 days of post-launch technical support included
- Hosting renewals, ongoing maintenance, paid plugins, and ongoing SEO services are billed separately

06

Our Development Process

1. **Discovery & Website Review**
   We'll review your current website, page structure, content, and technical requirements before development begins.

2. **Design**
   We'll create a refreshed homepage design and establish the overall design direction, including the reusable page templates. You'll have an opportunity to review the design before we move into full development.

3. **Website Development**
   Once the design is approved, we'll rebuild the website in Elementor, transfer the existing content, and migrate your blog posts.

4. **SEO & Quality Assurance**
   We'll review the website's technical SEO setup, navigation, internal links, mobile responsiveness, and functionality before launch.

5 **Website Launch**

We'll migrate the completed website to your selected hosting provider, complete the final testing, and launch the updated site.

6 **Training & Support**

We'll provide a training session so you can confidently manage your website, along with 30 days of post-launch technical support.

07

Moving Forward

Leo, I understand that you've invested a lot into your website over the years and want to make sure that investment isn't lost.

I also understand that you're looking for a more practical, sustainable way to manage your website as you continue learning and implementing SEO strategies.

My recommendation is to rebuild the website properly now, retaining the content and SEO work you've already completed, while creating a more flexible system that you can manage yourself moving forward.

This approach gives you a professionally designed and developed website without requiring ongoing development services for routine content updates.

Ready to Move Forward?

If you'd like to proceed, simply reply to the email with your preferred hosting option:

OPTION A

$5,200 CAD

For the website rebuild and migration to your preferred hosting provider.

OPTION B

$5,300 CAD

For the website rebuild with the first year of Leanne Digital hosting included and no migration fee.

Once you've confirmed your preferred option, we'll arrange the project deposit, finalize the scope, and schedule the work.

Thank you again for considering Leanne Digital. I look forward to the opportunity to work with you.

Leanne Jones
